BECAUSE WE CARE FOR YOUR COMFORT

"Implementation of IIOT for level measurement is the easiest and most uncomplicated upgradation you can do to your operations"

- our Customer

LEVEL TX VALUE - TOUCH OF FINGER

What is IIOT ?

Industrial Internet of Things, widely referred as IIOT has been in discussion for quite some time. It simply means having the output of any Field Device is connected and stored on an online server through Internet and can be viewed on your Laptop , Mobile, Tab without the need of a hard wired connection.

Contribution of EIP

Realising Coal Fly Ash is now a revenue for the Power Plant and accurate inventory to avoid its loss is essential , we at EIP have provided our Level Transmitters for 12 Nos. Fly Ash Silo to one of our customer and hosted their data on a server so that they can view the quantity of Fly Ash in all their 12 Nos. of Silos from the ease of their home using their mobile phones or laptop or any device. Adding to this we even have the possibility of sending SMS of the Level every 5 minutes to any cell phone number. In short the capabilities are many and the result is EASY and COMFORTABLE DECISION MAKING

EIP can provide a solution for Inventory Management System for any process industry
