

Nucleonic gauges - cause of worry, REALLY

My conventional Nucleonic Gauge requires

- Atomic Energy Approval
- RSO in plant
- Quarterly Reporting
- Yearly NOC
- Source Cs-137 (1.5 GBq/ 20-35 mCi)
- Health Problems

HURRAY

I use EPT Nucleonic (Density/ Level) - IPB-1K

- Uses Na-22 (0.7 MBq / 0.020 mCi)
- Exempted by Atomic Boards
- No Approval Required
- No Health Problems
- No RSO
- Completely Safe.
- No Reporting

"Saves Health, Time and Money"

SAFE AND HASSLE FREE SOLUTION

just for you
